

Summary

Experienced and innovative Technical Director with over 25 years of hands-on development, including with large multinational investment banks as well as small- and mid-sized financial and technical firms. Microsoft Certified in Azure AI Fundamentals. Able to leverage both technical and soft skills to provide clean, efficient solutions while providing vision and leadership to product teams, which has been useful in a variety of additional roles including Product Owner, Scrum Master, Senior Frontend Engineer, and Developer Advocate with a focus on enhancing Developer User Experience.

Senior Application Architect - DevEx Enterprise Engineering

Jun 2024 - Present

Bank of America

- Design data and API strategies for a suite of highly visible internal applications in developer experience and productivity domains
- Lead delivery teams in development and Agile best practices, and leverage deep hands-on experience to guide product ownership, release train engineer, and peer delivery teams to scalable solutions
- Accountable for successful delivery of major end-to-end features from a crowd sourcing initiative, consisting entirely of volunteers from disparate teams within the enterprise
- Regularly engage with delivery teams via design session, technical code reviews, and hands-on development in Oracle, Java Spring Boot, Angular, etc

Director of Engineering

Apr 2022 - Jun 2024

Q2 Strategies

- Principal hands-on engineer for an emerging AI-based NLP-to-SQL product feature, driving API integration with open-source and proprietary large language models (LLMs)
- Design, architect, develop, and maintain operations management software at a multinational Fortune 500 financial institution
- Led key effort to centralize and rationalize 45,000 SOP documents to reduce operational and regulatory risk, impacting 45,000 employees across 1,800 processes and saving many thousands of person-hours
- Manage and mentor a cross-functional Scrum team supporting the Office of the CIO in delivery of flagship product for a Change-The-Bank initiative, with focus on a crisp and engaging user experience
- Work closely with product ownership and UX designers, partner with external technical teams to fulfill critical data dependencies, and present key milestones to executive committees
- Provide both senior leadership and intensive hands-on development contributions in every sprint, including Angular, Q2DM API development, SQL Server, and Tableau
- Practice servant leadership in the role of Scrum Master
- Perform code reviews, provide technical guidance and architectural guardrails, and foster best practices
- Built blue/green deployment pattern from scratch and integrated into Gitlab CI/CD pipelines and Ansible job templates
- Introduced team to SonarQube and drove 80% minimum unit test coverage for all product increments - Ideated and secured prioritization and funding for a, "AI-as-a-Service" innovation initiative
